

The Nebraska Nursery and Landscape Association is offering a half-day workshop.

Attendees can look forward to an event that will provide a rich learning experience and networking opportunity.

2018 Workshop

Nebraska Nursery & Landscape Association
Tuesday, October 30, 2018

NNLA is once again offering this workshop as many attendees were unable to attend in January. Those who registered in January and were unable to attend can attend at no additional cost. Others can register at the rates listed on the back of this form.

Rain Gardens / Bioretention Gardens Workshop

Kelly Feehan, Andy Szatko, Steve Rodie & Tom Franti 1:00 - 5:00 PM

Landscapes today are designed to intentionally “do more” than just be beautiful. In the case of rain gardens, they help slow and soak in rainfall to protect and conserve water. Rain gardens attract pollinators and add biodiversity to landscapes. In this workshop, learn about:

- Stormwater runoff and the role of green infrastructure
- Debunking myths associated with bioretention/rain gardens
- In-depth information on rain garden design and step-by-step installation
- Effective plant selection and functions of plants in rain gardens
- Maintaining a landscape with bioretention features
- Case studies and lessons learned from bioretention/rain gardens installed in Nebraska.

Attendees will receive a copy of the manual, “Bioretention Gardens - A Manual for Contractors in the Omaha Region to Design and Install Bioretention Gardens.”

+ LOCATION

Nebraska Extension
Office in Douglas County
8015 W Center Rd.,
Omaha, NE 68124

+ SCHEDULE

12:30 - 1:00 p.m.
Registration & welcome
